

ANIMEVERSE LITEPAPER

A unique token set out to make a real difference in society by using anime & crypto in the DeFi space. **"The Future is bright, the future is AnimeVerse"**

VISION & MISSION

\$ANIME is a community-based ERC20 token combining anime with utility. The vision is simple, an ECO-SYSTEM designed to benefit society while generating passive income for investors.

Therefore, buy and sell tax is 9.8% each way with tokenomics that reward holders generously (Over 20% of the total tax is rewarded back to our holders). The mission has started, will you join the adventure and be part of making a difference?

VALUES

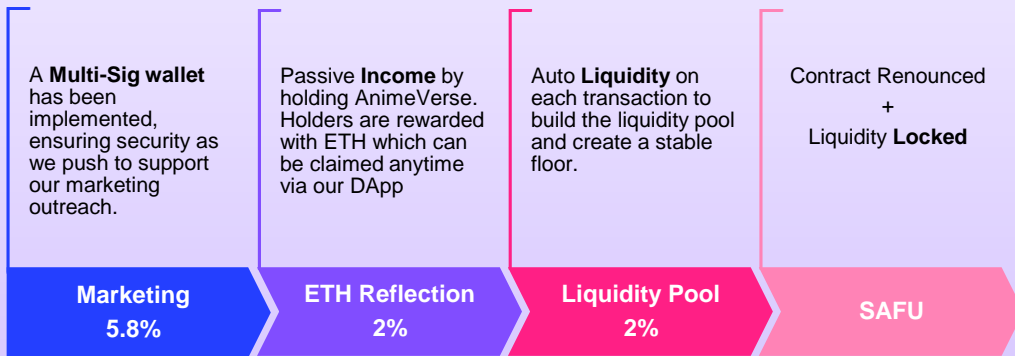

The AnimeVerse team strongly believe in being totally **TRANSPARENT** to our community. We will then build the **TURST** required to earn your respect and that comes through **HONESTY**. We want to make sure your hard earned money is secure and the community feels **SAFE** with the confidence in regards to token security. To achieve this we have a KYC and Smart Contract Audit in progress.

Total Token Supply 1 Trillion
Buy Tax / Sell Tax: 9.8%

Marketing Strategy

We will be utilising well respected callers in Telegram for our initial outreach. We will also be working with Crypto Twitter and YouTube influencers to increase our exposure. Planned AMA's, using Twitter Space, Telegram and Youtube platforms where crypto enthusiasts, potential investors, are free to ask questions around our mission and values at AnimeVerse. Further down the line we will enhance our marketing performance and use professional agencies to push AnimeVerse to new bounds as we tick off our deliverables on the roadmap.

THE FUTURE

AnimeVerse is focused on providing contributions to the youth and the organisations aimed at excelling their education. Contributions will be made in Crypto and also in the form of educational and creative thinking material such as Comic Books and Art Supplies. AnimeVerse will also introduce its HD P2E Metaverse game in the upcoming phases of our roadmap.
